BETTER COMMUNITY HEALTH: A NEW LANDSCAPE OF COMMUNITY HEALTH IN THE ERA OF AGING, URBANIZATION AND DIGITAL TRANSFORMATION

MAY 22, 2025

9.00 am - 12.00 pm

Overview

Community health has long been, and will increasingly be, a crucial pillar of universal health coverage, health equity, and sustainable healthcare systems. In the context of global aging, urbanization, and digital transformation, **how to advance the integration of medical and elderly care, the coordination between medical services and disease prevention, and the digital and intelligent transformation of community health systems has become a central issue in global health.** These are also core concerns of the School of Public Health at Fudan University and the Shanghai Institute of Major Infectious Diseases and Biosafety.

Representatives from Minhang's government, hospitals, public health institutions, and universities, alongside colleagues from Fudan University, the Shanghai Institute of Major Infectious Diseases and Biosafety, the University of Geneva, and international organizations, will share experiences and examine pathways for integrating care, prevention, and digital health in community settings.

This session aims to foster international collaboration and contribute to the advancement of resilient and inclusive community health systems globally.

Program

9:00 am **Registration**

9.30 am **Forum - Part I**

Chair

Dr. Xu Yanyi Assistant Dean, School of Public Health,
Fudan University
